 Plymouth, UK

Self-motivated full stack developer with three years' experience working as a developer in the UK tourism industry, with a complimentary Computer Science degree (First Class Honours). Proficient in fundamental front-end and server-side languages, with in-depth knowledge of Vue, React, Express and SQL. Penchant for UX and developing modern web applications that factor in unique demands for flexibility, accessibility and security. Familiar with working in fast-paced and high pressured environments, requiring fast turnaround. Looking for more opportunities to work regularly with Vue.js, an ecosystem I am passionate about.

Agile

Dev Ops

Work History

@Pitched Ltd
2019 – Current

Full Stack Developer

- Introduced and encouraged Pitched to utilize modern web technologies and methodologies such as React, Vue, Tailwind and Test Driven Development.
- Designed and Developed their self-sign-up process for their holiday booking system with Vue / Nuxt; increasing their online enrolment by 300%.

- Developed multiple web apps with React and Vue, all having a strong emphasis on UX. One example includes a complex API integrated CMS system for managing Caravan stock. Another includes a mobile first Caravan auctioning app, with both front facing and back facing requirements.
- Leveraged strong understanding of WordPress core to build over 20 custom themes with intuitive back offices and modern front-ends, viewed by thousands of visitors daily. Including a SaaS product (Pitched Elements) with over 15 paid subscribers.

@Freelance

2016 – Current

Web Developer

- Converted design assets into customizable WordPress themes, while adhering to SEO best practices.
- Translated customer requirements into technical site concepts before developing sites with required technologies.
- Built and styled new mobile-friendly websites, transitioning legacy presentations to simultaneous easy-to-use versions.
- Regularly organized meetings with clients to ensure their website would exceed their expectations.

Education

2017 - 2021

BSc Computer Science at Plymouth University

Graduated with a **First Class Honors** with Certificate of Professional Industrial Experience.

- I developed my final year dissertation with Vue.js and express – it received a strong first. The project, an Interactive Holiday Park Map, had the objective of making the process of booking a holiday and exploring a holiday park a more immersive and satisfying experience.
- I developed my final year Full Stack module with Vue.js, express and web sockets – the project was an online multiplayer shooter and received a mark of 87%.
